DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

I. The safety clip as shown in figures 1 and 5.

II. The safety clip as shown in figure 2.

III. The safety clip as shown in figure 3.

IV. The safety clip as shown in figure 4.

V. The safety clip as shown in figure 6.

VI. The safety clip as shown in figure 12.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species I. Claims 1-3, 5, 7, 8, 10-12, 14, 15, 20, 22-24, and 26-28.

Species II. Claims 1, 3-5, 8, 10-12, 14, 16, 17, 21-24, 26, 27, 29, and 30.

Art Unit: 3734

Species III. Claims 1, 3-5, 8, 10, 11, 13, 14, 16, 17, 21-24, 26, 27, 39, and 30.

Species IV. Claims 1, 2, 5, 7, 10, 11, 13, 15, 17-19, 22-24, and 26-28.

Species V. Claims 1, 2, 5, 8, 10-12, 14, 22, and 25-27.

Species VI. Claims 1, 2, 5, 10-12, 26, and 27.

The following claim(s) are generic: 1, 5, 10, 11, 26, and 27.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common technical feature is a safety clip for a medical catheter that comprises a shaft and a sleeve, the safety clip comprising an elongate body, an attachment member, a first spacing member, and a stop.

US Patent No. 6,146,415 discloses a safety clip for a medical catheter that comprises a shaft (34) and a sleeve (16), the safety clip comprising an elongate body (20), an attachment member (40), a first spacing member (30) and a stop (col. 6, ln. 18-67).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
